

Scholars Portal Dataverse Update

By: Kevin Worthington

Date: October 27th, 2016

What is **The Dataverse** Project

- Open source research data repository
- For organizing, sharing/promoting, research replicability and archiving data
- Developed by Harvard's Institute for Quantitative Social Science (IQSS)
- Predecessor projects
 - Virtual Data Center (VDC) (1999-2006) for collaboration with MIT
 - Automatic transfer of cataloging information using FTP (1987-1999)

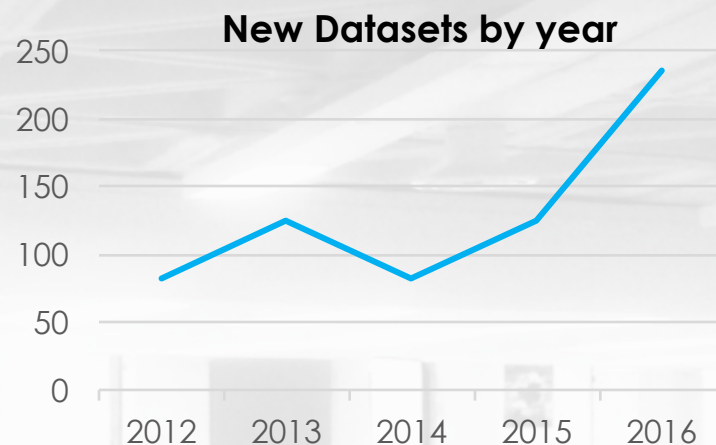

Dataverse Features

- Supports uploading of any file format
 - .zip, .xls, spss, sas, stata, pdf, doc, etc.
 - Version Control
- Allows Administration
 - Data management
 - Organize, Create, Update, Delete, Feature
 - Roles and Permissions at the file-level
 - Terms of Use
 - Theming
 - Metadata element inclusion
- Persistent ID support
- API's
- Sharable widgets

Background

- Deployed Ver. 3.6 at SP in 2011 by Steve Marks
- Self-deposit model (anyone can signup and deposit data)
- Currently have
 - 127 Dataverses
 - 688 Datasets
 - 8133 Files
 - approx. 390 GB size
- 13 OCUL libraries using it
- Curating multidisciplinary data
- All to satisfy the growing need to deposit and share research data easily with others

New Features from Upgrade

- DataCite Canada Digital Object Identifiers (DOIs)
 - DOI minting for new data deposits
- Extended metadata support
 - Health & Life Sciences, Geosciences, Social Sciences, Astronomy, Journals
 - Harvesting and Export support with OAI-PMH
- Nested Dataverses
- Shibboleth support (SSO)

Custom Development

- Internationalization
 - Translations provided by Universite de Montreal – Beta Launched October 2016
- DDI Explorer
- Custom splash page
- Institutional
 - Dataverse mapping
 - Affiliation using IP Groups
 - Redirecting
- Released Ver. 4.5.1 On October 25th 2016

Dataverse Before

Scholars Portal **Dataverse**

POWERED BY THE **Dataverse Network** PROJECT v. 3.6.2

SP Dataverse Network

[Create Account](#) [University of Toronto IP Group](#) [Log In](#)

[Advanced Search](#) [Tips](#)

The Scholars Portal Dataverse network is a repository for research data collected by individuals and organizations associated with Ontario universities. The Dataverse platform makes it easy for researchers to deposit data, create appropriate metadata, and version documents as you work. Access to data and supporting documentation can be controlled down to the file level, and researchers can choose to make content available publicly, only to select individuals, or to keep it completely locked. All data is hosted on Canadian servers, in a secure environment that conforms to industry best practices for maintaining data integrity and longevity.

For more information on Scholars Portal Dataverse, visit [Dataverse at Scholars Portal](#).

Dataverses

[Create Dataverse](#)

78 Dataverses

A **Dataverse** is a container for research data studies, customized and managed by its owner.

Canada's federal research agencies are strong advocates for making publically-funded research data as accessible as possible. In 2016, the Tri-Agency released a [Statement of Principles on Digital Data Management](#) that outlines expectations and responsibilities for research data management and open data sharing.

Research Data Preservation

- Addresses a preservation gap in Dataverse
- Contracted Artefactual Systems to integrate Dataverse and Archivematica
- Functional requirements were developed in cooperation with Canadian Dataverse users (e.g. UofA, SFU, UBC)
- Goal is to automate transfer of studies from Dataverse to Archivematica for long-term preservation
- The results of this test will be reported on for the broader research data community

Dataverse-Archivematica Integration Workflow

PERMAFROST Hosted Preservation Pilot

- Currently working with identified pilot partners to determine needs, develop terms, and scope services
- Vision is hosted instance of Archivematica connected to the Ontario Library Research Cloud (OLRC)
- Pilot will (hopefully) begin in Spring 2017
- The project is being led by Grant Hurley – contact grant@scholarsportal.info for more information

Next Steps

- Continue testing for scalability and preservation of research data
- Leverage IP Group Access (new in 4.5.1)
- Complete French translations
- Refine Advanced Analysis component
- Release Dataverse Bridge in ODESI
- Geospatial data support
