

# About

## **Online storage, sharing and registration of research data, during the research period and after its completion. That is DataverseNL.**

DataverseNL is a shared service provided by participating institutions and DANS. DataverseNL uses the [Dataverse software \(http://dataverse.org/\)](http://dataverse.org/) developed by Harvard University, which is used worldwide.

### Log in

To log in to DataverseNL, you can use your institutional profile via the SURFconext authentication system. If your institution is not connected via SURFconext, go to <https://dataverse.nl> (<https://dataverse.nl/>) and create a local account via the sign-up button. The first time you create an account, you must agree to the [terms and conditions that apply to DataverseNL \(https://dans.knaw.nl/en/about/services/DataverseNL/copy\\_of\\_07102019\\_DataverseNLGeneralTermsfuse.pdf\)](https://dans.knaw.nl/en/about/services/DataverseNL/copy_of_07102019_DataverseNLGeneralTermsfuse.pdf) (.pdf).

### Support

If you have any questions, please see our [list of frequently asked questions \(https://dans.knaw.nl/en/about/services/DataverseNL/dataversenl-faq?set\\_language=en\)](https://dans.knaw.nl/en/about/services/DataverseNL/dataversenl-faq?set_language=en) first. If there are still questions or you want additional support when using DataverseNL, please contact your institution's local administrator (see the list below). He / she can also help with the permissions of your account.

Are you leaving your institution? Please inform your local administrator.
