

Definition of SIP

Scholars Portal Definition of SIP

1. Submission Information Package (SIP)

- The information package that is delivered to Scholars Portal for use in the construction of one or more AIPs.
- The format of the SIP may vary from provider to provider, based on the publisher's willingness and ability to provide the content and metadata in a specific format.
- In all cases, the level of content the publisher will provide will be specified in the OCUL License agreement, or in a document supplementing the same.
- For a given Content Type, any requirements or restrictions on the type of content that can be contained in the SIP will be described in that Content Type's Preservation Action Plan.
