

About

Scholars GeoPortal (<http://geo.scholarsportal.info>) is an award-winning* geospatial data discovery tool, allowing Ontario's university students and researchers to enrich their teaching and research by engaging with the Ontario Council of University Libraries (OCUL)'s growing collection of geospatial data. The portal offers search, preview, query, download and sharing functionality for datasets licensed by Ontario university libraries, covering such topics as land use, transportation networks, census boundaries, geology, soils, points of interest (such as healthcare facilities, schools, and airports), air photos, and more.

Scholars GeoPortal is the result of a 3-year project supported by the Government of Ontario through its OntarioBuys initiative. A collaborative effort including the work of OCUL members and faculty from across the province, the Scholars Portal team, and partners from the Ontario government, this new platform is powered by Esri's ArcGIS suite of software. Scholars GeoPortal was launched on March 1, 2012. A big thank you to all our [working group and committee members](#) who made this project happen.

Scholars GeoPortal's features include:

- full-text searching
- geographic searching by place names and addresses, or by drawing a box on the map
- adding data to the map view & manipulating the transparency and draw order of layers on the map
- selecting from a variety of base maps
- identifying individual features on the map
- viewing and querying attribute tables
- annotating the map by marking and labelling points and shapes of interest
- saving maps to your user account
- printing, exporting, or sharing (linking to) your map
- downloading data in a variety of formats and projections
- both French and English language interfaces

Scholars GeoPortals' collections currently include data from Statistics Canada (through the Data Liberation Initiative), Ontario Ministry of Natural resources (through the Ontario Geospatial Data Exchange), and DMTI Spatial Inc. Data from these providers is continually being added to the portal - check out the latest additions under "New Data" on the Scholars GeoPortal website.

For more information on OCUL's Scholars GeoPortal, please contact Leanne Hindmarch, Data & Geospatial Librarian, Scholars Portal, leanne@scholarsportal.info.

*OCUL's geospatial data platform [Scholars GeoPortal](#) was awarded the 2012 Ontario Library and Information Technology Association (OLITA) [Award for Technical Innovation](#) .
