

SPOTDocs Upgrade Scheduled for Thursday, November 1st

SPOTDocs will be unavailable between 7pm and 9pm on Thursday evening for a software upgrade.

SPOTDocs will be upgraded from version 5.10 to version 6.12 of Atlassian's Confluence software. In addition to an updated look & feel, the new version has several exciting features to support collaboration:

- **Collaborative editing:** Much like Google Docs, you can edit a page collaboratively in real time with other users.
- **Desktop editing of attachments:** Attached files can be opened on your desktop for editing and saved directly back into SPOTDocs.
- **Improved file preview options:** Preview slide decks and more from within SPOTDocs.
- **Customizable sidebars:** Each SPOTDocs space has its own customizable sidebar, which can include links to the space's blog, shortcuts to key pages for each group, and more.
- **Mobile support:** The new version of SPOTDocs will be accessible via Atlassian's Confluence mobile app for easier on-the-go editing.

For more information about new or upgraded features, please see the [release notes](#) for recent versions of Confluence.
