About Dataverse

About

Scholars Portal Dataverse is a publicly accessible Canadian data repository provided as a shared service of the Ontario Council of University Libraries (OCUL). Dataverse can be used by anyone in the world to deposit, share, and archive research data.

Researchers can manage and publish research data on the Scholars Portal Dataverse instance by setting up an account. Dataverse is a repository for sharing, citing, analyzing, and preserving research data, and is open to all disciplines, worldwide. It uses best practices in data management and archiving to keep your research data secure.

The Scholars Portal Dataverse hosts institutional and research group Dataverses, each one being a digital archive for storing and sharing research data.

Interested in depositing data? Go to Scholars Portal Dataverse.

For more information contact dataverse@scholarsportal.info.

Development

Dataverse is an open-source software. Harvard University's Institute for Quantitative Social Science (IQSS), along with many collaborators worldwide provide software development contributions. Scholars Portal is a collaborator and contributor to the Dataverse project (see Dataverse community members).
