

TRAC2 4.2.6.3

4.2.6.3 - The repository shall ensure that the PDI is persistently associated with the relevant Content Information.

Introduction

SP stores Preservation Description Information in each AIP's Preservation Metadata. PDI is persistently associated with Content Information by a link to the location of the relevant object(s) on disk and, if necessary, a link to information stored in the Marklogic database.

Responsibility

Digital Preservation Policy Librarian
