

# TRAC2 4.2.6

**4.2.6 - The repository shall have documented processes for acquiring Preservation Description Information (PDI) for its associated Content Information and acquire PDI in accordance with the documented processes.**

## **Introduction**

SP PDI comes from two sources: the Provider and the repository's internal processes. In both cases the PDI is stored in the preservation metadata which contains a link to Content Information.

## **Responsibility**

*Digital Preservation Policy Librarian*
