TRAC2 4.4.2.2

4.4.2.2 - The repository shall be able to demonstrate that any actions taken on AIPs were compliant with the specification of those actions.

Introduction

In the repository, all actions taken on AIPs are done programmatically. This ensures that actions are consistent and compliant with specifications. Any deviation that the program encounters appears as an error and is recorded and reported to the loaders.

Responsibility

Digital Preservation Policy Librarian
