TRAC2 4.2.7.2

4.2.7.2 - The repository shall execute the testing process for each class of Content Information of the AIPs.

Introduction

Examples of feedback from the Designated Community can be found on the Feedback Forum located on the repository's user interface as well as in user emails sent directly to SP staff.

The preservation metadata gathered within the AIP can be used to evaluate the composition of the collections in SP, in order to identify those objects which are at risk of not being usable, understandable, or accessible by the Designated Community.

Responsibility

Digital Preservation Policy Librarian
